# Intellectual Property Terms Addendum – v2.0

This addendum clarifies IP rights for work done under the MCA.

---

## 1. Pre-Existing IP

Pre-existing IP owned by Consultant includes:

- Fox ML Infrastructure (Fox-v1-infra) system and pipelines
- ML research frameworks
- HPC infrastructure tooling
- Internal development utilities

---

## 2. Client-Owned Deliverables

Work created exclusively for the Client under Tier 2 or Tier 3 development becomes **client-owned deliverable IP**, except where it incorporates Fox ML Infrastructure components.

---

## 3. Derivative Works

If deliverables extend or build on Fox ML Infrastructure components:

- Client receives an internal-use license to the derivatives.
- Core Fox-v1-infra IP remains owned by Consultant.

---

## 4. Open-Source Components

Open-source components follow their upstream licenses.

---

## 5. Reuse of Non-Proprietary Elements

General engineering patterns, templates, and non-client-specific methods may be reused.

No client data or confidential algorithms will ever be reused.

---

## 6. Documentation

Documentation follows the same ownership rules as code.

---

## 7. Negotiation

Custom IP terms may be negotiated via SOW.
